HIGH SCHOOL IMMUNISATION PROGRAM 2013

Your child may not need the year 7 Hepatitis B vaccine.

Is your child born after 1\textsuperscript{st} May 2000?

If your child was born after 1\textsuperscript{st} May 2000 it is very likely they received the hepatitis B vaccine as part of their childhood immunisation schedule and they do not require the second dose of Hepatitis B vaccine that will be offered at the school during terms 3 and/or 4.

If you are not sure and would like to confirm your child’s Hepatitis B status please look in their Personal Health Record (blue book) or you can contact the Australian Childhood Immunisation Register at [www.medicareaustralia.gov.au](http://www.medicareaustralia.gov.au) or call them on 1800 653 809.

**To withdraw consent** or if you require **further information** about the ACT high school immunisation program please contact the School Health Team on 62052086. If the phone is unanswered please leave your name, best daytime contact number, your student’s name and school and we will return your call within a week.

**Please note that a booster dose is not required for Hepatitis B.**

Thank you

School Health Team
